PROFESSIONAL SUMMARY

Senior Java Backend Engineer with 10+ years of experience in enterprise e-commerce and payment platforms. Skilled in Java, Spring Boot, Microservices, REST APIs, and Oracle ATG Commerce. Delivered 4+ secure payment integrations, including BNPL and CyberSource. Led teams of 5–6 engineers and delivered cloud-based services across AWS, GCP, and Oracle Cloud Infrastructure (OCI Certified). Developed Generative AI applications using RAG and OpenAI APIs.

KEY SKILLS & TOOLS

Languages & Frameworks: Java, J2EE, Spring Boot, Quarkus, JPA/Hibernate
Architecture & APIs: Microservices, REST, JAX-RS, Hexagonal, Event-Driven
Cloud & DevOps: AWS, GCP, OCI, Docker, Kubernetes, Jenkins, Azure DevOps
Messaging & Databases: Kafka, JMS, SQS, Oracle SQL, PostgreSQL, MongoDB, Redis
E-Commerce & Payments: Oracle ATG, Salesforce CRM, CyberSource, BNPL, Zip Pay
Observability & Testing: ELK, Splunk, Sumo Logic, JUnit, Postman, Swagger, SoapUI
Frontend & GenAI: React.js, Angular, JavaScript, OpenAI APIs, RAG, Prompt Engineering
Security & Integration: HTTP/HTTPS, TLS, Apigee, AuthN/AuthZ, PCI DSS, GDPR

EDUCATION

B.E. in Computer Science and Engineering | Percent - 81% *2016*
Prathyusha Engineering College, Chennai

Higher Secondary in Computer Science | Percent - 85% *2012*
Sir M.C.T.M Hr Sec School, Chennai

CERTIFICATIONS AND TRAINING

OCI Certified Architect Associate - Oracle *Sep 2026*

Apache Kafka Fundamentals Accreditation - Confluent *Aug 2026 – Aug 2028*

OCI Certified AI Foundations Associate - Oracle *Jul 2026 – Jul 2028*

Kibo Business Administration Certification - Kibo *Dec 2024 – Dec 2026*

Docker Essentials & Kubernetes Essentials - IBM

Applied AI Foundations - OpenAI | Introduction to Generative AI - Google

AI, Cloud & Architecture Exposure

KEY ACCOMPLISHMENTS

- 10+ years delivering enterprise Java, e-commerce, payment, integration and cloud-native solutions.
- Led a 5–6-member engineering team and reviewed 40+ pull requests quarterly while enforcing JUnit and SonarQube standards.
- Delivered 4+ secure payment and checkout workflows including CyberSource, BNPL, Zip Pay and virtual-card flows.
- Modernized 6+ Oracle ATG core services into microservices in 2 months, one month ahead of schedule.
- Delivered a shipping-estimate service handling approximately 40k requests/month during peak season.
- Maintained high-traffic checkout reliability with 98.95% uptime and reduced MTTR by 20% using ELK-driven incident analysis.
- Deployed GCP/Kubernetes workloads scaling to 10–15 pods during peak order volumes.

EMPLOYMENT HISTORY

OLR Retail, Bangalore | Senior Technical Consultant *Mar 2023 – Present*

Intersoft Solutions Pvt Ltd, Gurgaon | Technical Analyst *Jul 2021 – Mar 2023*

Skoruz Technologies, Bangalore | ATG Developer *Nov 2020 – Jul 2021*

Ilabz Technologies, Chennai | ATG Developer *Jan 2020 – Nov 2020*

Redgrape Business Services, Chennai | Developer *May 2018 – Jan 2020*

Six-Sigma Consultancy, Chennai | Software Developer *Jun 2017 – May 2018*

RT-Medibus Technologies / Call Health, Chennai | Software Engineer *May 2016 – Apr 2017*

Senior Technical Consultant | E-Commerce Solution Services – OLR Retail - Client: Comex / Grupo Nazan

Mar 2023 – Present | Bangalore, India

- Architected and delivered Java/Spring Boot and Oracle ATG features across checkout, cart, promotions, pricing, order management, payments, tax, shipping and Salesforce CRM integration via 10+ REST APIs, reducing feature delivery cycle time by 30%.
- Ensured production reliability for high-traffic checkout and payment flows, achieving 98.95% uptime and reducing MTTR by 20% through ELK-based incident analysis and RCA.
- Led a 5–6-member team, reviewed 40+ PRs quarterly in Azure Repos, and enforced JUnit/SonarQube standards to reduce defects and merge issues.
- Engineered 5+ React.js UI pages integrated with Java/Spring Boot REST APIs, improving API latency by approximately 20%.

Technical Analyst | Payment & EDD Microservices Integration – Intersoft Solutions Pvt Ltd - Client: Bed Bath & Beyond

Jul 2021 – Mar 2023 | Gurgaon, India

- Migrated CyberSource payments from legacy SOAP-based hosted checkout to REST-based Flex Microform v2, strengthening PCI-compliant tokenized card capture and checkout reliability.
- Delivered 4+ secure payment and checkout workflows including BNPL, Zip Pay, virtual card and order submission, plus a shipping-estimate service processing ~40k requests/month with 95% peak-season availability.
- Reduced post-release production issues by ~15% through proactive monitoring, unit/integration/API regression testing and CI/CD collaboration.

ATG Developer | ATG Commerce Monolith to Microservices Migration – Skoruz Technologies - Client: Walmart

Nov 2020 – Jul 2021 | Bangalore, India

- Modernized legacy Oracle ATG order-processing components into REST-based microservices covering authentication, payment, shipping, tax and API validation.
- Transitioned 6+ core services from the monolithic platform to microservices in 2 months, one month ahead of schedule, while leading architecture discussions, code reviews, builds and deployments.
- Deployed and operated 2 applications on GCP with Kubernetes, maintaining ~98% service availability and scaling to 10–15 pods during peak traffic.

ATG Developer | Non-SIM Accessories – Ilabz Technologies - Client: TCS *Jan 2020 – Nov 2020 | Chennai, India*

- Designed 5 Oracle ATG Commerce workflows across catalog, ordering, shipping, tax and order management, supporting 100+ additional orders/day.
- Created an Angular/Spring Boot log-analysis tool to retrieve SOAP requests/responses and simplify troubleshooting.
- Integrated 2 applications via Sales Hub APIs, streamlining marketplace navigation and internal support workflows.

Developer | SKY – Redgrape Business Services - Client: Direct Wines Limited

May 2018 – Jan 2020 | Chennai, India

- Strengthened payment validation for EMEA and international markets, implemented Bouncy Castle credit-card encryption, migrated stored cards to the new encryption scheme and added Oracle ATG subscription features.
- Upgraded Oracle ATG 10.2 to 11.3 and JBoss EAP 5 to 7, modernizing the platform.
- Configured Pinterest tracking through Google Tag Manager to support conversion attribution and analytics.

Software Developer | SUNDANCE – Six-Sigma Consultancy - Client: Redgrape Business Services

Jun 2017 – May 2018 | Chennai, India

- Implemented secure commerce features including payment tokenization and authorization, replacing raw card handling with internal tokens.
- Automated subscription order workflows using scheduled services for recurring orders, payments and deliveries.

- Introduced GDPR-compliant data-privacy enhancements covering customer-data protection and retention controls.

Software Engineer | Jenkins Migration – RT-Medibus Technologies / Call Health
May 2016 – Apr 2017 | *Chennai, India*

- Migrated build automation from CruiseControl to Jenkins and developed C#/SVN utilities for SQL deployment automation and rollback.
- Accelerated build and deployment pipelines to complete within ~30 minutes and added commit-triggered compilation checks for rapid developer feedback.
- Automated Jenkins CI/CD pipelines with failure notifications and role-based access controls.
