Professional Summary

Senior Software Engineer and Technical Consultant with 10+ years of experience building and supporting enterprise e-commerce and cloud-native applications using Oracle ATG Commerce, Java, J2EE, Spring Boot microservices, REST APIs, React.js, JavaScript, AWS, GCP, Docker, Kubernetes, and CI/CD. Experienced in end-to-end feature delivery, distributed systems, secure payment and checkout platforms, system integration, production reliability, performance troubleshooting, testing, code reviews, and technical mentoring. Led a 5–6 member engineering team and collaborated with international product, business, QA, DevOps, frontend, backend, and third-party stakeholders. Built a Generative AI voice-based knowledge assistant using OpenAI services and RAG concepts. Open to relocation.

Work Experience

Senior Technical Consultant **Mar 2023 – Present**

OLR Retail – Comex / Grupo Nazan Client, Mexico

Project: Comex / Nazan E-Commerce Solution Services.

- Design, develop, maintain, and support Oracle ATG Commerce and Java-based enterprise features across checkout, cart, promotions, pricing, order management, payment gateways, tax, shipping, catalog, and CRM workflows using REST integrations.
- Contribute to backend and frontend delivery by coordinating Java services, APIs, browser-side integrations, analytics flows, and customer journey validation across cross-functional engineering teams.
- Support scalable and reliable production systems through incident response, RCA, ELK/Splunk log analysis, defect triage, debugging, performance troubleshooting, deployment validation, and continuous monitoring of critical checkout and payment flows.
- Apply engineering quality practices through code reviews, API validation, JUnit-based testing, regression coordination, release-readiness checks, and post-production verification.
- Collaborate with business, Product, QA, frontend, backend, DevOps, and third-party teams while leading and mentoring a 5–6 member engineering team and influencing technical delivery decisions.

Technical Analyst **Jul 2021 – Mar 2023**

Intersoft Solutions Pvt Ltd – Bed Bath & Beyond Client

Project: Zip Pay / BNPL Integration.

- Developed 4+ secure payment and checkout workflows, including BNPL, Zip Pay, virtual credit card authorization, order submission, and robust REST API integrations.
- Supported shipping-estimate microservices and distributed commerce workflows with focus on scalability, reliability, security, and integration quality.
- Performed unit and integration validation, regression support, production issue analysis, API testing, monitoring, and cross-system troubleshooting across payment and order flows.
- Worked with cross-functional teams to convert business requirements into production-ready solutions and support reliable releases through CI/CD and DevOps collaboration.

ATG Developer **Nov 2020 – Jul 2021**

Skoruz Technologies – Walmart Client

Project: ATG to Microservices Migration.

- Built Oracle ATG REST services and modernized legacy ATG order-flow dependencies into modular microservice-based systems.
- Implemented authentication, payment, shipping, tax, and API validation features for commerce modernization.
- Supported architecture discussions, code reviews, builds, deployments, troubleshooting, and release activities during a major ATG-to-microservices migration.

ATG Developer **Jan 2020 – Nov 2020**

Ilabz Technologies – TCS Client

Project: Non-SIM Accessories with Oracle ATG Commerce.

- Delivered catalog, product ordering, shipping, tax, and OMS workflows and implemented validate-order and submit-order pipelines.
- Built an Angular and Spring Boot internal utility for log search and Sales Hub API integration, demonstrating full-stack delivery across backend and frontend components.

Developer **May 2018 – Jan 2020**

Redgrape Business Services – Direct Wines Limited Client

Project: Project-SKY.

- Enhanced payment validation, credit-card encryption, subscription features, and Oracle ATG commerce workflows with emphasis on security, maintainability, and production stability.
- Coordinated defect validation, regression testing, deployment verification, and release readiness while supporting production debugging and post-deployment optimization.

Software Developer **Jun 2017 – May 2018**

Six-Sigma Consultancy – Redgrape Business Services Client
Project: Project-SUNDANCE.

- Implemented secure commerce features including payment tokenization, authorization, subscription workflows, GDPR changes, and enterprise commerce enhancements.
- Contributed to two major modernization initiatives: Oracle ATG 10.2 to 11.3 upgrade and JBoss EAP 5 to 7 migration, including validation, deployment readiness, and production support.

Software Engineer **May 2016 – Apr 2017**
RT-Medibus Technologies Pvt Ltd
Project: Call Health.

- Migrated build automation from CruiseControl to Jenkins and improved CI/CD workflow tracking and release traceability.
- Developed C# SVN utilities, integrated Redmine with source-control commits, and supported SQL deployment automation, rollback, and error handling.

Technical Skills

Backend / Commerce: Oracle ATG Commerce, Java, J2EE, Spring, Spring Boot, Microservices, REST APIs, Web Services, JMS, JAX-RS, JUnit, Log4j, distributed systems, clean architecture principles.
Frontend: React.js, Angular, JavaScript, HTML, CSS; transferable experience for Vue.js-based product development.
Generative AI: OpenAI APIs, RAG concepts, file-based knowledge retrieval, speech-to-text, text-to-speech, prompt engineering, AI workflow integration.
Cloud / DevOps: AWS, GCP, Docker, Kubernetes, Jenkins, CI/CD, Git, Maven, Gradle, Linux, containerized application deployment and troubleshooting.
Testing / Quality: JUnit, unit testing, integration testing, API testing, regression testing, code reviews, release validation, production monitoring.
Databases / Observability: Oracle SQL, MS SQL, MongoDB, Cassandra, ELK, Elasticsearch, Splunk, Sumo Logic.
ATG / E-Commerce Integration: Oracle ATG Commerce, ATG Commerce Pipelines, Repositories, Catalog, Pricing, Promotions, Cart, Checkout, Orders, Payments, Shipping, Tax, BCC, OMS, Kibo Commerce, Salesforce CRM, APIGEE, CyberSource, GTM, Pinterest CAPI, Facebook CAPI.
Tools: Postman, Swagger, Jira, GitHub, Eclipse, IntelliJ IDEA.

Personal Projects

- **DharmaAI – Voice-Based Book Knowledge Assistant:** Designed and built a Generative AI assistant using OpenAI file-based retrieval, speech-to-text, text-to-speech, and RAG concepts to provide grounded answers from uploaded books; documented the architecture, sequence flows, and roadmap toward a custom RAG pipeline and agent-based capabilities.
- **HelpCorner:** Designed a mobile and backend donation platform that connects donors, distributors, and beneficiaries, enabling structured resource sharing, request tracking, and coordinated fulfilment.
- **Himaja Communication ERP:** Built an ERP-style workflow solution for customer management, service tracking, operational coordination, and end-to-end business process handling.
- **Cloud / DevOps Portfolio:** Developed hands-on Spring Boot projects using Docker, Docker Compose, Kubernetes, Jenkins, AWS, and GCP to demonstrate containerization, CI/CD, deployment, and cloud-native engineering practices.

Certifications

- Docker Essentials: A Developer Introduction – IBM | Issued Jul 2026
- OpenAI Agents and Workflows – OpenAI
- OpenAI Applied AI Foundations – OpenAI
- Kibo Business Administration Certification – Kibo | Issued Dec 2024 | Expires Dec 2026
- Java SE 8 Programmer Training – Udemy | Issued Jan 2023
- APIGEE Training – Udemy | Issued Nov 2021
- AWS Solution Architect Training – Udemy | Issued Oct 2020
- Git Crash Course Training – Udemy | Issued Aug 2020
- Chrome Developer Tools Training – Udemy | Issued Sep 2020

Education

B.E. Computer Science and Engineering – 81% **2012 – 2016**
Prathyusha Engineering College, Chennai
Higher Secondary – Computer Science – 85% **2011 – 2012**
Sir M.C.T.M Hr Sec School, Chennai
